

MY MAGICAL JOURNEY

An Epic Modern Fairytale (TV Series)

A tiny, mysterious figurine of horse and rider provides a seemingly ordinary woman with the key to her extraordinary existence: as a 16th-century female warrior reincarnated to champion freedom and power for women once again, to a world finally awakened.

SCOPE

"When a woman gives birth to a daughter, she has given birth to herself-a monster. A woman is more poisonous than any animal, more evil and vicious than the devil himself. "

An ancient document found during Karen's quest reveals the widespread beliefs that have created a legacy of disempowerment and suppression of the divine female spirit, and permeated the culture to modern times; and within the feminine heart: the crippling fear to be seen, the fear to show her true power and be punished for it.

And now, finally, the world is ready to change the story and embrace healing...

A Medieval secret sisterhood of the Nine, that risked their lives in forbidden meetings, to alleviate

suffering, through, magic, knowledge of the stars, and plans of rescuing forgotten women from the torture chambers deep in the stone belly of Saint Emilion. But they perish one by one-by sword, by fire, and by the hopelessness of their plight-only to rise again in the 21st century, finding each other in this life to unite once again, now when the time is ripe for enlightenment.

The Nine conquer their own fears and personal battles along the way to discovering the truth of their mission-to uncover a secret hidden for centuries by the Catholic Church-the truth about Jesus and Mary Magdalene which has been veiled to keep the feminine spirit shrouded in darkness and despair-until now.

It is a story of injury and healing, of friendship and love, and of despair and hope that have lasted through the centuries to heal and blossom again in the awakening period.

The world is changing. Old power structures are dissolving everywhere and lead to chaos and insecurity.

The evolutionary history of the earth has sojourned 2000 years of male dominance, in which female power has been degraded to a variety of weaknesses.

The history of women to date is a story of oppression, which is full of injuries and traumas in the deep consciousness of every person and, above all, every woman. The memory of persecution, torture and violent death is stored in people's cell consciousness and now leads to great inner conflicts in the era of collective awakening. The increase in depression and illnesses are symptoms, which cannot be cured with conventional methods.

The time has come for a new awareness of who we humans really are, what strengths we have and how we can use them to create a new world order.

People have never been more open and ready to face a new perception and receive messages of hope and inspiration. At this point, the film industry gets a new responsibility.

It is no longer just about entertainment;

it is about producing films that support the process of transforming humanity without losing wow factor and financial success. Films that build a bridge between fiction and reality, exchange weapons for the power of the heart and inspire people to stand up and set out on their own magical soul journey.

Every man and woman, regardless of age, skin colour and religion, will recognize themselves in these stories, because in each person lives a soul that has lived many times and is now ready to dissolve the shadows of the past, to provide the best of themselves to the world.

THE VISION SPIRIT OF THE TIME

AUTHOR

Karen Sailer, born in 1962, grew up in Germany and has lived in Ibiza, Spain since 1995. When asked when she was 14, what she wanted to be, she replied: veterinarian, textile designer, landscape architect, writer and filmmaker. She followed her thread, studied veterinary medicine, was chief designer of a carpet company in Nepal for 7 years and then became Ibiza's most successful landscape architect for 25 years. As a modern medicine woman, who has learned from the great wisdom keepers of our earth, she has cultivated her gift of turning deserts into paradises into soul-rejuvenating work with people and horses. In 2010 she founded the award-winning Alegria project, in which young people learn together with horses the spiritual and practical tools of life in order to be prepared for the world.

Then once again she created a new way to spread a life-sustaining message: "Love your life, learn the tools, live your dream" is her motto with which she led thousands of women out of depression and towards their true life's purpose in her online program Wild Heart in 2019.

Karen Sailer has often shed skin and, with the journey back to her past life as a warrior in 16th century France, opened a new chapter in her eventful life. The publication of a 12-minute short film in February 2019 about her experience with the old equestrian figure and the decision to openly and authentically share her magical journey on social media has suddenly made her a public person, which has been breathlessly followed by thousands of people.

In summer 2019, she produced the 30-minute short film *My Magical Journey*, which led to a standing ovation at the premiere in Cologne in November. A week later, the film won the Best International Short Film Award at the Equus Film Festival in Kentucky.

Karen Sailer extended her new career as an author and producer in January 2020 to other films that serve the transformation of humanity. Her first appearance as an executive producer is the documentary *The Black Cowboy* by Charles Perry, which tells the story from the perspective of the black cowboys who have been cut out of America's success story to this day.

In 2020 she will support the German cinema production *Wildherz* as a co-producer, mentor and actress.

Her magical journey is far from over. Her goal is to inspire millions of people with her films to live an authentic, self-determined and mindful life so that a new matrix of respectful coexistence between men and women, races and religions on our planet, will emerge.
